

SCHOOL FARM PROJECT

Come and learn with us about gardening and farming - identify plants, trees, weeds, pests and birds!

All children will start their own herb patch, plant crops and learn how to care for them. Together, we will build raised flower beds that we will use for planting herbs and crops. We will take part in a national gardening photo competition!

Suitable for all children with an interest in outdoors and gardening - exact focus will be based on children's age.

The School Farm project will run throughout the whole school year, with different focus in each term depending on the weather. Registrations will be held each term.
